

**Listing of the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-43. (Withdrawn)

44. (Original) A data storage device for housing data from functional areas of an enterprise, the data storage device comprising:

at least two hubs, wherein each of the at least two hubs includes a primary key, a stamp indicating the loading time of the primary key in the hub, and a record source indicating the source of the primary key;

at least two satellites, wherein each of the at least two satellites is coupled to at least one of the at least two hubs in a parent-child relationship, further wherein each satellite includes a stamp indicating the loading time of data in the satellite and a business function;

a link to provide a one-to-many relationship between two of the at least two hubs; and

a detail table coupled to at least one of the at least two hubs, wherein the detail table includes attributes of the data from the functional areas of the enterprise.

45. (Original) A data storage device as claimed in claim 44, wherein each of the at least two satellites further includes at least one of a primary key, business data, aggregation data, user data, a stamp indicating the time of at least one of user data insertion and user data alteration, and a record source.

46. (Original) A data storage device as claimed in claim 44, and further comprising a second satellite coupled to at least one of the at least two hubs in a parent-child relationship.

47. (Original) A data storage device as claimed in claim 44, wherein the link includes at least two foreign keys and a stamp.

48. (Original) A data storage device as claimed in claim 44, wherein each of the at least two hubs further includes an associated business key and a stamp includes indicating the loading time of the associated business key.
